

Omnia Gamal Mohamed

Frontend Developer

omniagamal5588@gmail.com | +20 155 427 0735 | github.com/omniagamal5588 | linkedin.com/in/omnia-gamal

SUMMARY

Frontend Developer specializing in React.js, Next.js, and TypeScript, with a track record of shipping responsive, component-driven web applications from design hand-off to production. Comfortable owning the full UI layer — reusable component systems, REST/server-state integration, complex form workflows, and multilingual interfaces. Focused on clean, maintainable code and measurable improvements to user experience and delivery speed.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries	React.js, Next.js, React Native
State Management	Redux Toolkit, Zustand, React Query (TanStack Query)
Forms & Validation	React Hook Form, Formik, Zod
Styling & UI	Tailwind CSS, Shadcn UI, Bootstrap, Figma
Tools & Practices	Axios, REST APIs, next-intl (i18n), Git, responsive design

EXPERIENCE

Frontend Developer — Spark Systems

06/2025 – Present · Cairo, Egypt

- Build production web applications with React.js, Next.js, and TypeScript across multiple client projects.
- Design and maintain a library of reusable, accessible UI components with Tailwind CSS and Shadcn UI, cutting repeat build time on new screens.
- Integrate REST APIs and manage server state with React Query, standardizing data-fetching, caching, and loading/error states.
- Implement type-safe form validation and submission flows using React Hook Form and Zod.
- Deliver multilingual (i18n) interfaces with next-intl, including full RTL/LTR support.

PROJECTS

Mobdra — Car Import Platform for Egyptian Expats [↗](#)

Next.js · JavaScript · Bootstrap · Zustand · Formik · REST APIs

- Integrated REST APIs powering vehicle listings, import requests, and user registration.
- Built dynamic, multi-condition registration forms with Formik, using conditional fields to adapt to each import scenario.
- Redesigned and rebuilt the platform UI for full cross-device responsiveness.
- Shipped core commerce features: vehicle catalog, cart, multilingual support, and FAQ pages.

Sela SuperApp — Employee Engagement & Collaboration Platform [↗](#)

Next.js · TypeScript · React Query · Tailwind CSS · Shadcn UI

Sela Wall — Social Feed

- Developed core social features: notifications, post reactions, and content sharing.
- Built a chat-based shared-content experience letting users view and manage content shared with them.
- Implemented advanced search and filtering to improve content discovery across the feed.

Strategy Fit — Evaluation Workflow

- Built a multi-step Strategy Fit evaluation form with complex conditional logic to assess business-opportunity alignment.
- Engineered dynamic form flows that branch by project type (Internal / Business) with scenario-based validation rules.
- Created a structured data-collection system: attachment uploads, user confirmations, and submission handling.
- Added a step-based progress indicator and handled edge cases end-to-end for accurate validation and smooth flow.

Silicon21-HQ — Corporate Website

Next.js · TypeScript · React Query · Tailwind CSS · Shadcn UI · SaaS APIs

- Designed and built the full corporate UI with modern animations and responsive layouts in Tailwind CSS and Shadcn UI.
- Integrated REST APIs for vendor data, enabling dynamic filtering and rendering of partner listings.
- Built a structured media-center module: news, videos, image gallery, and downloadable resources.
- Implemented supplier and partner sections driven by dynamic data integration.

El Garage — Automotive Equipment E-Commerce Platform

Next.js · JavaScript · SCSS · Zustand · Axios · GSAP

- Built product category and listing pages with dynamic filtering by brand and country of origin.
- Developed a multi-product compare feature and global search with brand-specific error-code lookup.
- Engineered a quote request cart flow with quantity controls and API form submission via Axios.
- Delivered full Arabic/English localization (RTL/LTR) and GSAP-animated page transitions.

EDUCATION

B.Sc. in Medical Informatics — Faculty of Computers & Artificial

09/2019 – 06/2023 · Banha

Intelligence, Banha University

- Major: Medical & Health Informatics · GPA 3.2 / 4.0 (Very Good) · Graduation Project: A+ (Excellent)

CERTIFICATES

Information Technology Institute (ITI) — Intensive

Frontend & Cross-Platform Track · 4 Months

Code Camp (ICC)

- Trained in modern frontend development with React.js and Next.js, plus cross-platform mobile with React Native.
- Delivered projects following industry best practices in UI development, state management, API integration, and responsive design.
